

NORTHISLE COPPER AND GOLD INC.

Environmental Policy

Northisle Copper and Gold Inc. (the “**Corporation**”) is committed to minimizing the impact on and conserving the quality of the natural environments in areas where it operates. The Corporation recognizes that the long-term sustainability and success of its business is dependent upon good stewardship in both the protection of the environment and the efficient management of the exploration and extraction of mineral resources.

References to the “Corporation” herein refer collectively to Northisle Copper and Gold Inc. and all of its subsidiaries.

To achieve its environmental commitment, the Corporation will:

- establish and maintain management systems to identify, monitor, eliminate and/or mitigate the environmental impacts of its activities;
- apply a proactive risk-management approach to safeguard and protect the environment;
- ensure compliance with all applicable environmental legislation and regulations, and relevant industry guidelines;
- foster an environmentally responsible culture and encourage workforce behaviours that promote environmental stewardship;
- encourage open dialogue and maintain processes for receiving and responding to stakeholder concerns with respect to the Corporation’s environmental commitments;
- minimise its use of water, control and manage its impact on water quality and protect local water resources;
- use energy and other natural resources as efficiently as possible;
- allocate sufficient resources to ensure environmental risks are adequately addressed during all phases (exploration, design, construction and closure) of each project;
- be prepared to effectively respond to emergencies that involve hazardous substances;
- strive for the highest quality of waste management;
- conserve biodiversity, protect flora and fauna, and aim for zero net negative impact;
- ensure that all tailings storage facilities are located, designed, constructed, operated and closed in compliance with all applicable laws and regulations and in alignment with best industry practices;
- transport, store and use cyanide and other reagents responsibly and in compliance with the International Cyanide Management Code (ICMC); and
- monitor, assess and audit its operations to ensure continuous improvement of its environmental performance.

Directors, officers, employees and contractors (“**Representatives**”) of the Corporation as well as visitors to site are expected to adhere to the commitments set out in this Policy.

APPROVED BY THE BOARD OF DIRECTORS EFFECTIVE AS OF MAY 11, 2021.
